```java
package cars;

public class Showroom {

    public static void main(String[] args)
    {
        Car c1 = new Car("Toyota", "Camry", 15000, 18.5);
        Car c2 = new Car("Honda", "Civic", 20000, 16.0, "John");
        Car c3 = new Car("Hyundai", "i20", 12000, 20.0);

        c1.displayDetails();
        c2.displayDetails();
        c3.displayDetails();

        c1.setOwnerName("Harshal");  // using setter
        c1.updatePrice(16000);

        System.out.println("After Updates:");
        c1.displayDetails();

        Car.showShowroomName();
        Car.showTotalCars();
    }
}
```
